The 5490C Series 5½ and 6½-digit bench multimeters are designed for accuracy, repeatability and ease-of-use. A wide measurement range with speeds up to 1000 readings per second, and a basic DCV accuracy up to 35 ppm deliver stable measurement results quickly and accurately. These general purpose meters are well suited for demanding engineering, production and service applications.

The multimeters feature simple and intuitive switching between the 12 measurement functions and display modes for a variety of test setups. Display modes include bar meter, trend chart, and histogram which can be combined with statistics or math functions. The dual measurement feature enables the simultaneous display of 2 measurements, e.g. AC voltage and frequency. Additionally, Limit mode and Probe hold mode allow users to conveniently verify and compare readings.

For remote communication, this series includes standard LAN, USB (USBTMC-compliant) and RS232 interfaces, as well as a GPIB option. A LabVIEW™ driver is provided to simplify system integration and instrument control. The front panel USB host port can be used for transferring screen captures and measurement data, logged with date and time stamp, from the multimeter’s internal memory to a computer.

**Operating software**

The provided operating software supports remote instrument control, live measurement monitoring, and data logging.

**Features and benefits**

- 12 measurement functions: DCV, ACV, DCI, ACI, 2 and 4-wire resistance, capacitance, frequency, diode, temperature, continuity test, DCV Ratio
- High-contrast 4.3-inch full color LCD
- Histogram, bar meter, and trend chart offer a variety of data analysis options
- Accurate frequency measurements to 1 MHz
- Display Min, Max, Peak-Peak, Average, Standard Deviation statistics simultaneously
- Null, dB, dBm, %, mx+b, and run/stop math functions
- Internal storage buffer holds 10,000 readings
- Measurement speed up to 1000 readings/s
- 35 ppm basic DC voltage accuracy
- 2-wire and 4-wire resistance measurements down to 10 Ω
- Dual measurement display
- Temperature measurement capability using a Pt100 or 5 kΩ thermistor probe
- Rack mount kit option (RK02)
- Rear input terminals for rack use (6½-digit model only)
- Standard USB (USBTMC-compliant), RS232, and LAN interfaces, GPIB option
- Real-time clock/calendar to set/read time and date
Digital Multimeters
5490C Series

Front panel

USB host
Save and recall settings, transfer screen captures, export measurement data files

LCD display
4.3-inch, high contrast, adjustable brightness

Function keys
Quickly cycle between different measurement modes

Rear panel

Rear input terminals
6½-digit models only

Optional GPIB interface
Models 5492CGPIB and 5493CGPIB

External trigger
Trigger input to synchronize with other events and instruments

Remote interfaces
LAN, USB (USBTMC-compliant) and RS232 interfaces standard
Digital Multimeters
5490C Series

Powerful measurement tools

Multiple measurement and display options

- **Bar meter with limit mode**
  - DC Voltage
    - **Auto 10V**
    - **+0.26919 VDC**
  - Limit On
  - Lower Limit: 1.000000
  - Upper Limit: +1.000000
  - Beep On
  - Clear Condition
  - Done

Set upper and lower limit levels with PASS/FAIL counter and indicators.

- **Trend chart**
  - Displays live data in graphical form.

- **Histogram with statistics**
  - Histogram display mode to view distribution of measurement data.

- **Statistics display**
  - Minimum, maximum, peak-to-peak, average, standard deviation
  - Reading buffer holds 10,000 data samples

Versatile math functions

- **DC Voltage**
  - **+0.14599 dB**
  - dB/dBm
  - Function
  - Reference
  - Reference Value
  - Measure
  - Reference Value
  - Done

In addition to statistical data and limit test mode, this series is capable of Null, dB, dBm, mX+b, run/stop, and percent calculation functions.

- **DC voltage ratio measurement**
  - Displays the ratio between two separate DC voltage measurements within ±12 Volts. This function is useful to quickly verify the difference between input and output magnitudes of low voltage circuits.

- **Dual measurement display**
  - **Frequency**
    - **100.200 Hz**
    - Type
    - Range
    - AC Filter
    - Gate Time
    - 2nd Measure
    - AC Voltage

Simultaneously display multiple measurements such as frequency and AC voltage.

- **Probe hold mode**
  - Use probe hold mode to quickly compare a series of readings. Stable readings are captured and added to a list of up to eight measurements.

Min/Max measurement capabilities

- **DC Voltage**
  - **0.1 µV** to **1000 V**
  - **0.1 nA** to **100 nA**

- **DC Current**
  - **10 µA** to **10 A**

- **DC Resistance**
  - **100 MΩ**

- **AC Voltage**
  - **10 nV** to **750 V**

- **AC Current**
  - **0.1 nA** to **100 nA**

- **Capacitance**
  - **0.1 pF** to **10 µF**

- **Frequency**
  - **2.2 Hz** to **1 MHz**

5492C/5492CGPIB
5493C/5493CGPIB
Specifications - 5492C / 5492CGPIB

Specifications are based on the following conditions:
- One year calibration cycle
- Calibration temperature $T_{CAL} = 23 \ ^\circ C$
- Accuracy specifications: $\pm (\% \ of \ reading \ + \ % \ of \ range)$, valid for $T_{CAL} \pm 5 \ ^\circ C$
- For DC: The technical specifications are valid after a warm-up time of 60 minutes, with the integration time set to 10 or 100 NPLC, and auto zero enabled.
- For AC: The technical specifications are valid after a warm-up time of 60 minutes, slow AC filtering enabled, using a sine wave input signal.

</table>

(2) Valid for sine wave input > 0.3% of range and greater than 1 mVrms.
(3) Three filters are available for low-frequency performance: 3 Hz, 20 Hz, and 200 Hz. No additional errors will occur for frequencies above these filter settings.
(4) 20% overrange on all ranges except 750 V range which can only test 5% overrange.
(5) 750 V range is limited to 8 x 10^7 Volt-Hz.

</table>

(5) Applies for sine wave input and gate time set to 1 second.

(6) For sine and square wave input larger than 100 mV. For a 10 mV to 100 mV input, multiply the % reading error by 10.

(7) For frequency measurements greater than 750 kHz, use manual ranges for best accuracy.

(8) Square input specified for 10 Hz to 300 kHz.

About B&K Precision
For more than 70 years, B&K Precision has provided reliable and value-priced test and measurement instruments worldwide.

Our headquarters in Yorba Linda, California houses our administrative and executive functions as well as sales and marketing, design, service, and repair. Our European customers are most familiar with B&K through our French subsidiary, Sefram. Engineers in Asia know us through our B+K Precision Taiwan operation. The independent service center in Singapore services customers in Singapore, Malaysia, Vietnam, and Indonesia.

Quality Management System
B&K Precision Corporation is an ISO9001 registered company employing traceable quality management practices for all processes including product development, service, and calibration.

ISO9001:2015
Certification body NSF-ISR
Certificate number 6Z241-IS8
