BK PRECISION

Programmable AC Power Source 9830B Series

The 9830B Series programmable AC power sources provide high performance and low total harmonic distortion in a 3U form factor. The addition of positive and negative DC offset voltages expands the AC capabilities to operate in DC and AC+DC output coupling modes. The user can select built-in and user-defined harmonic waveforms or select from standard sine, square or clipped sine outputs. The high output current crest factor and low input resistance are suitable for high inrush current measurements when evaluating capacitive or inductive loads. 3-Phase power can be achieved by connecting 3 units of the same model in a master and slave configuration using the optional TL983P 3-Phase sync adapters.

Measurement display

	Output On			
300.0	Vrms	10.00 Arms		Program
60.00) Hz 3	00.00	w	Configure
V _{pp} 4 +A _{pk}	124.00 0.00	S (VA) Q (VAR)	0.00	System
-Apk Inrush (A	0.00	CF PF	0.00	Display 2 of 3
Out				

All 12 measurements can be displayed simultaneously on a large and bright 4.3" color LCD

Model		9832B	9833B	
Max. Power		2000 VA	3000 VA	
Max. Voltage	AC (rms)	I50 V / 300 V		
	DC	± 212 V /	′ ± 424 V	
Mary Comment (mars)	0 - I50 V	20 A	30 A	
Max. Current (rms)	0 - 300 V	10 A	IS A	
F	Single phase	45 Hz to I200 Hz		
Frequency Range	3-Phase	45 Hz to 600 Hz		
Total Harmonic Distortion (THD)		\leq 0.5 % at 45 Hz to 400 Hz (resistive load)		
Remote Interface		LAN, USB, GPIB, and RS232		

3-Phase AC power

Connect additional units for split, 2 and 3 phase testing.

- Supports 3-phase Y configuration
- Full 0° to 360° phase control
- 45 Hz to 600 Hz operating frequency
- Up to 2000 VA / 3000 VA per phase

Features & Benefits

- AC, DC and AC+DC power source
- 3-Phase capability using 3 AC sources and the 3-Phase kit (TL983P-KIT)
- Low total harmonic distortion (THD) meets the IEC 61000-3-2 standard
- Comprehensive measurement capabilities Vrms, Arms, Vdc, +Apk, -Apk, inrush current, frequency, power factor, apparent power, reactive power, true power, and crest factor
- 0.98 power factor at AC input stage
- Built-in standard waveforms sine, square, clipped sine
- 30 built-in THD waveforms
- Amplifier mode with 1.2 kHz bandwidth for generating user-defined arbitrary waveforms
- Step, List and Pulse modes for generating power line disturbance (PLD) simulations. List mode supports 10 user-defined programs with up to 100 programmable steps
- Generate custom harmonic waveforms on a PC and download them to the instrument's
 5 non-volatile memory locations
- Digital I/O port supporting external trigger, transient indication, failure status indication, remote inhibit, RS232, and external analog output level programming interface
- Comprehensive protection modes OVP, OCP, OPP, OTP, fan failure, output timer and key lock
- LabVIEWTM driver and application software with soft panel for remote control available
- Control the AC source from a standard web browser via built-in web server

Applications

- · Pre-compliance testing
- Simulate grid faults, voltage sags, frequency, and phase disturbances, according to IEC61000-4-1I/14/28/34
- Electromagnetic compatibility (EMC), according to IEC61000-3-2
- Consumer electronics, appliances, industrial controls, avionics
- Evaluate transformers, TRIACs, SCRs, and passive components

Front panel

Intuitive user interface

The numeric keys and rotary knob provide a convenient interface for setting output parameters quickly and precisely. All measurements and setting values are concurrently displayed on the screen including a graphical display of the output waveform. Up to 100 instrument settings can be saved and recalled to and from internal storage memory. Save screenshots and save /recall settings to the USB host interface.

Rear panel

2 bkprecision.com

Operation highlights

Adjustable AC/DC voltage levels, frequency and timing parameters allow for simulation of voltage drops and periodic power surges and sags. Step, pulse and list modes are used to generate complex power line disturbance simulations. Select from built-in waveforms or generate user-defined waveforms with the included PC software or by connecting an arbitrary waveform generator to the instrument's analog input.

Step mode

Generate step-up or step-down output based on user-defined voltage, frequency, phase, and interval settings.

Waveform operations

Select sine, square, clipped sine or harmonic distortion waveforms. Set amplitude, frequency and phase.

Pulse mode

Pulse mode allows the generation of single or multiple pulses with user defined voltage, duty cycle, and phase. Either AC or DC (-424.0 to +424.0 V) output operation is supported.

DC offset

The 9830B Series is capable of generating AC+DC waveforms. When operating in pulse, step and list mode, the AC signal can be combined with either a positive or negative DC offset voltage, allowing users to create a wide range of waveforms.

List mode

List mode supports the generation of complex output sequences with varying time, amplitude, frequency, and voltage. Up to 100 steps in 10 programs can be saved and executed. This allows the user to build a wide range of waveforms to simulate power grid faults and disturbances.

Built-in THD Waveforms

Select from 30 built-in THD (total harmonic distortion) waveforms

9830B Series

Operation highlights

Arbitrary waveform generation in amplifier mode

To further extend the capabilities of the 9830B series, custom waveforms can be applied to the analog BNC input. The custom waveform can be created using WaveXpress™, a comprehensive stand-alone B&K Precision application, allowing users to easily generate, edit, and upload custom waveforms to an arbitrary waveform generator, which then drives the AC power source output. WaveXpress™ allows users to define waveforms by importing a csv file, define it freehand on the computer, or by importing a real-world waveform captured on a digital oscilloscope.

4 bkprecision.com

Three and multi-phase operation

Phase settings

Set voltage, frequency, and phase directly from the front panel on each AC source.

3-Phase kit option

The 3-phase kit (TL983P-KIT) includes three adapters and two standard pin to pin RJ45 cables.

Phase synchronization

The TL983P adapters connect to the Digital I/O connector on the rear of the AC source. Standard RJ45 communication cables connect each adapter to route the 3-phase synchronization signal from the master to the slave units.

The 8-pin digital I/O terminal block preserves commonly used signaling pins including remote inhibit, AC on, and fault out capabilities while in 3-phase operation.

Application software

Application software offers convenient control, monitoring, and data logging capabilities. This software supports three-phase mode or multi-phase mode for different applications.

Three-phase mode

Control voltage and frequency of the three-phase system remotely using the application software. Phase values are fixed at 0°, 120°, and 240°. The output monitor window displays live voltage, current, and power measurements for each connected AC source.

Multi-phase mode

Multi-phase mode allows for direct control of individual AC source parameters including voltage and phase.

Specifications

Model			9832B	9833B		
AC Output						
Output Phase			Single			
Maximum Power			2000 VA	3000 VA		
Voltage Low		0 to 150 V				
Range ^l (rms)	High		0 to 300 V			
_ , ,	Low		20 A 30 A

About B&K Precision

For more than 70 years, B&K Precision has provided reliable and value-priced test and measurement instruments worldwide.

Our headquarters in Yorba Linda, California houses our administrative and executive functions as well as sales and marketing, design, service, and repair. Our European customers are most familiar with B&K through our French subsidiary, Sefram. Engineers in Asia know us through our B+K Precision Taiwan operation. The independent service centers in Singapore and Brasil service customers in Singapore, Malaysia, Vietnam, Indonesia and South America, respectively.

Quality Management System

B&K Precision Corporation is an ISO9001 registered company employing traceable quality management practices for all processes including product development, service, and calibration.

ISO9001:2015

Certification body NSF-ISR Certificate number 6Z241-IS8

Video Library
